Portfolio: satyamotipalli.github.io/portfolio

PROFESSIONAL SUMMARY

Full-stack developer with 4+ years delivering production IT projects end to end — requirement analysis, design, development, testing, deployment and production support across multiple verticals. Builds dynamic, scalable user interfaces with Angular (8–19), React, TypeScript and Next.js, backed by RESTful services in Node.js and NestJS using connection pooling and clean architecture. Increasingly focused on AI integration — context-aware agents and AI-driven features with LangChain and the OpenAI API.

EDUCATION

B.Com (Computers), 2017

Adikavi Nannaya University, Rajamahendravaram

TECHNICAL SKILLS

Frontend: Angular (8–19), React, Next.js, TypeScript, JavaScript, HTML, CSS, PrimeNG

Backend: Node.js, NestJS, Python, Strapi, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, SQL, Connection Pooling

AI & Automation: LangChain, OpenAI API, Intelligent Agents, NLP, Prompt Engineering

Cloud & DevOps: Azure DevOps, Azure Boards, Azure Repos, Azure Pipelines, Git, Kafka

Tools & Practice: VS Code, Postman, Swagger, Power BI, Agile (Scrum), Waterfall

WORK EXPERIENCE

Software Developer

Sparity Soft Technology Pvt. Ltd. | April 2022 – Present

- Full-stack delivery across Angular / React / Next.js and Node.js / NestJS.
- Built reusable component libraries, pipes, directives, hooks and services.
- Integrated secure auth (MSAL, RBAC, Keycloak) and RESTful services across production apps.
- Implemented Keycloak SSO with realm/role mapping and token-based session handling.
- Worked with PostgreSQL & MongoDB, plus exposure to Kafka-based event flows.
- Drove AI integration with LangChain and OpenAI — agents and LLM workflows.

Project 1: Pathsaathi — ERP & LMS Platform (Client: Ampersand Group)

Duration: May 2026 – Present

Tech Stack: Next.js, React, NestJS, Python, Strapi, TypeScript, MongoDB, PostgreSQL, Kafka

Multi-vertical education & skilling platform serving admins, teachers, students, parents and industry partners across centres in India — admissions, finance, attendance, transport, LMS and vocational skilling end to end.

Responsibilities & Achievements

- Built admin, teacher and student modules on Next.js 13 / React with reusable hooks.
 - RBAC via Strapi with dynamic permission resolution and menu rendering.
 - Business logic across Admissions, Finance, Academics and LMS verticals.
 - Integrated RESTful services bridging multiple back-ends.
-

Project 2: Tax Litigation Management (Client: Deloitte)

Role: Angular Developer | Duration: Jun 2022 – Jan 2026

Tech Stack: Angular 12, PrimeNG, .NET (C#), PostgreSQL, Power BI, MSAL

Deloitte's Direct & Indirect Tax litigation tool — a role-based platform where stakeholders run reports and perform tax-management activities by permission.

Responsibilities & Achievements

- Integrated MSAL for secure authentication and login.
 - Excel exports, file uploads and dynamic form-array builders.
 - Custom pipes, directives and utility services for reuse.
 - Power BI reporting; Azure Boards/Repos for delivery.
-

Project 3: AP Police Hackathon Portal

Role: Full-Stack (solo) | Duration: Jun 2025 – Jul 2025

Tech Stack: React, Node.js, MySQL, REST APIs

End-to-end portal managing registration, approval and reporting for the AP Police Hackathon — company teams, professionals, students, volunteers and guests with a powerful admin console.

Responsibilities & Achievements

- Solely responsible for the entire application, front to back.
 - Conditional Company / Professional / Student registration flows.
 - Admin dashboard for approvals, reports and live charts.
 - Auth and edit-access for approved members.
-

Project 4: Nutri AI — Diet Recommendations

Role: AI / Full-Stack | Duration: Jan 2025 – Sep 2025

Tech Stack: React, Python, LangChain, OpenAI, MongoDB

Doctor-patient platform where patients upload health reports and receive LLM-generated personalized diet plans under a doctor's observation.

Responsibilities & Achievements

- End-to-end OpenAI + LangChain diet-automation workflow.
 - Agents parse inputs and generate doctor-guided plans.
 - Prompt-engineering for context-aware output.
 - Secured health data and logs in MongoDB.
-

Project 5: Gen AI

Role: Angular Developer | Duration: Mar 2024 – Aug 2024

Tech Stack: Angular 17, Python, MySQL, NLP

AI platform for natural-language queries and file uploads — SQL-query conversion and unstructured-data analysis showcasing NLP and DB integration.

Responsibilities & Achievements

- Modular Angular 17 components with conditional rendering.
 - Robust signal handling for inter-component communication.
 - Deferred view loading for performance.
 - Owned design through deployment.
-

Project 6: Help Desk — Support Portal (Client: Sparity, internal)

Duration: Nov 2023 – Apr 2024

Tech Stack: Angular, Node.js, SQL, REST APIs

Internal ticket-management portal streamlining employee service requests through a PM approval workflow routed to Admin, HR and IT.

Responsibilities & Achievements

- Role-based interfaces for Employees, PMs, Admins, HR, IT.
 - Node.js APIs for the full ticket lifecycle and auth.
 - Connection pooling for SQL consistency and performance.
 - Reusable Angular components for form handling.
-

Project 7: EBMS — Electricity Billing (Client: BEDC, Nigeria)

Role: Angular Developer | Duration: May 2022 – Oct 2022

Tech Stack: Angular, TypeScript, REST APIs, Web Services

Electricity billing management for Benin Electricity Distribution Company — consumer, billing and payment modules, revamped to add prepaid alongside post-paid.

Responsibilities & Achievements

- Active across requirements, design, dev, testing, debugging.
- Custom pipes, directives and utility services.
- Business logic across consumer, billing and payments.
- RESTful service integration front-to-back.
